

# Applied Foundation Testing

## Remote Vibration and Noise Monitoring

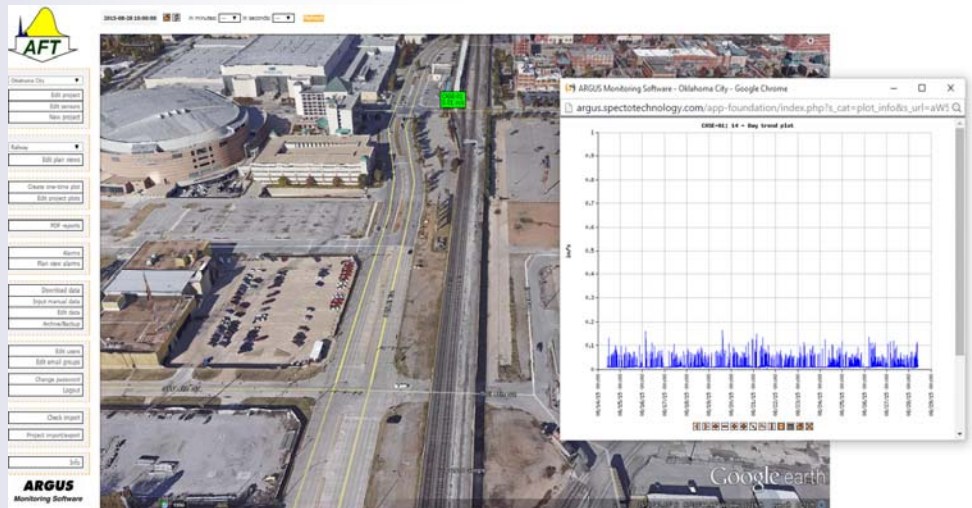

### Introduction:

AFT is pleased to offer Remote Vibration and Noise Monitoring services with ARGUS™ web service. Leverage precise, dependable geophone technology with cellular modem support for web access, text message and email alerts, and remote data collection.

### Features:

- Multiple long and short-term rental options
- Simple, all-inclusive subscription rates
- Reduce cost by reducing equipment service time
- Receive signed and sealed reports from a specialty engineer
- Combine with AFT engineering consultation and structural survey services for an all-inclusive existing structure protection program!

ARGUS™ Remote Monitoring Software subscription included with your equipment rental

## Contact **APPLIED FOUNDATION TESTING** for further information and costs
